

Our Mission

Advancing education, learning, academic study, and knowledge will contribute to scientific, cultural, social, environmental and economic development within Wales and beyond.

As Wales' National Academy, we will harness the multidisciplinary expertise, experience, and connections of our Fellowship to promote and develop Wales' research and innovation community, and to support the use of excellent and diverse research to solve the challenges faced in Wales and across the world.

We will do this by:

Making an impact

Ensure policymakers and influencers recognise the relevance of the Society, welcoming and using us, as a source of trusted, independent, evidence-informed expert advice, to find solutions to real- world challenges.

Fostering collaboration

Create and strengthen multidisciplinary connections, within Wales and beyond, to realise benefits from Wales' research and innovation base, thereby helping to tackle national and global issues.

Growing talent

Advocate for the diverse and vibrant culture of Welsh research and support an environment that makes Wales a great place to be a researcher, so we can help retain and grow our existing knowledge base and develop our future experts.

Promoting inclusivity

Build a welcoming Society whose Fellows, and their contributions, represent the diversity of our nation; and work in partnership with others to promote inclusivity.
